Subject: electrical hook up

Hi Chris,

Thank you for arranging to have the railing repaired! It looks so much better!

I forgot to send off an email describing the permission I am seeking to move forward with a grant to the province's Cultural Innovation Fund. I am looking for the support and permission of Council to apply for funding to have an electrical hookup installed beside the Kiack Brook gazebo and to utilize the area for events. This would enable access to electricity for events, for charging devices by trail users and visitors and potentially electric vehicles.

Please let me know if there are any questions regarding this request.

Sam
