

The Cape Sable Historical Society are interested in accepting ownership of the Cape Light lens/dome providing the following conditions can be met:

- The Municipality of Barrington can draft a long term lease agreement for the Cape Sable Historical Society at no charge to the Society.
- A secure pad and housing will be constructed and maintained in perpetuity at no charge to the Society.
- Property maintenance will be conducted in perpetuity at no charge to the Society.
- Should the Society find funding to access the purchase of interpretive panels at the site, it would be helpful if the MoB or ToCH assist with the installation in an in-kind gesture.

Essentially, the Society cannot afford to cover any associated costs for this item save the liability coverage that would be an addition to their current sites' coverages. The artifact itself is not insurable.

Please let me know if I have omitted anything you think should be included. The Society is happy to be able to play a role in helping to ensure this piece of history remains for our collective communities to enjoy.

Regards,  
Sam
