1. For the purpose of providing a sun safety environment for our participants and staff, it is the policy of the Barrington Municipal Recreation Department that staff will take

measures to protect program participants and themselves against the harmful effect of the sun.

This is important because Skin cancer is the most preventable form of cancer. Skin cancer is linked to sun exposure in youth and is preventable. As staff and participants often spend time outdoors during recreation programming, the Municipality of Barrington should work with staff, parents and participants to protect their future health by educating them about protecting their skin and adopting sun safe behaviours while outdoors. It is not the intent of this policy that the Barrington Municipal Recreation Department eliminates outdoor activities, but rather to support them in a proactive, sun safe manner.

2. It shall therefore be the responsibility of Program and Aquatic Co-ordinators to:
 1. Provide staff with a t-shirt and hat as part of their summer uniform.

 3. Post sun safety signage at our program sites.
 4. Make staff knowledgeable about symptoms of dehydration. Have a water supply at all programs, where physical activities are involved.

4. During programs, outings and special events staff shall:
 1. Provide developmentally appropriate, accurate information and activities about the practice of sun safety where and when appropriate in programs.
 2. Make reasonable effort to the extent that it is possible to see that sun screen is applied on all program participants 30 minutes before going outside. Once outside, staff should, to the extent that it is possible, make a reasonable effort to see that sun screen is reapplied, if in their opinion it is necessary.
