

EMO COORDINATOR'S REPORT
2014-2015

The hurricane season was a quiet one overall. Post tropical storm *Arthur* hit the province on Saturday, July 5, 2014. Wind gusts were close to 100 km/hr. There was some tree damage and a few downed utility lines, and also a few pockets of power outages that lasted two to three days.

Winter ended up being more of an old fashion winter with below normal temperatures from mid January to late March. Snowfall was above what we have been used to over the past number of years. There were not any major issues that caused EMO any problems to deal with.

Attendance at planning meetings has been as large as I would like to see it.

The major highlight of the year was the update and rewrite of the Emergency Plan.

Also, the *Plan Ahead* flyer was updated and mailed to all households in the Municipality and Town.
